Description

If you're looking for new techniques to add to your arsenal of glass art skills, look no further than art glass innovator, Cathy Claycomb. On this Webinar DVD, Cathy will show you how to combine art glass with copper foil overlays to create stunning glass sculptures. These overlays can be used to create scenes, embellish details, or add subtle hidden images. You will learn to design, trace, cut, burnish, and solder your overlay. She'll share her tricks for controlling the heat to avoid cracking your glass. And, of course, you'll find out the best ways to clean your piece and apply patina.

Please note this is a data DVD to be played on your COMPUTER.
